You have to be a... i, ii i V1 V2. Rotation axis. -.Atrophy and augmented fat with reduced adipocyte lipoprotein lipase activity in the internal layer of abdominal and buttock fat in humans. The distribution of fat in subcutaneous abdominal and buttock depot was assessed in 16 men and 13 women aged 24-71 yr. The total adipose tissue area, the lipid volume, and the fat cell size were determined by means of densitometry of computed tomography and micrometry, respectively. The brown fat cell percentage was estimated by means of cytophotometry. In addition, the pre- and postheparin lipolytic activity of lipoprotein lipase was measured in the perifemoral adipose tissue. The weight of the depots was comparable to that reported for the obese. The brown fat cell percentage was considerably lower in the buttock than in the abdominal depot and exhibited a weaker rise with age in the latter. The volume of fat cells per depot was not constant throughout the age-range and increased with age in the buttock depot but not in the abdominal depot. The postheparin lipolytic activity of the abdominal depot was considerably higher than that of the buttock depot and it was unaffected by age. Thus, it seems that the body fat distribution has a certain intra-depot variability which is inversely related to age. Furthermore, the larger fat cell size of the buttock depot compared with that of the abdominal depot could indicate that the former depot has a higher lipoprotein lipase activity than the latter depot.

MR - X - YEAR: 13  
TAGS FOR MR. X-YEAR: 0.01 This is a template for the challenge, which is to write a story in the first person and from your perspective. I created this template because I didn't want to set a particular genre, genre is just a word, and we all know genres are far from accurate. There is no restriction on the length of the story, but I would like you to describe the person you are and your motive. For example, if you want to write about someone who is like a twisted version of yourself, you can. What will you know about this person? It is up to you, but as long as you are clear about your objective, we will be fine. You should also name the person and use her/his name if you are happy to. But don
