Sorcerer

Sorcerer

Practice and study are for arcane sorcerers, scion of Tiamat

When it comes to drawing forth magic, sorcerers are born to the role, or stumble into it through circumstance, and pursue their talents with passion.

Because the idea of an innate magical power tends to breed mistrust and suspicion, sorcerers are often defined by their actions as much as their abilities. Playing a sorcerer character is a chance to flesh out and personalize your character's backstory.

Arcane Origin

Some sorcerers understand magic as a force to be harnessed, while others only speculate, since their powers are often innate. Does your character know the source of their magic, or is it a blind chance? If you select an origin, reveal it to your DM.

Paladin

Paladin

The true worth of a paladin is measured not in foes defeated or dungeons plundered. It is measured in lives saved and hearts turned to the causes of mercy and justice.

A paladin is a living embodiment of an oath—a promise or a vow made manifest in the person of a holy warrior who has the skill and the determination to see the cause through to the end. Some paladins devote themselves expressly to protecting the innocent and spreading justice in the world, while others resolve to attain that goal by conquering those who stand defiant and bringing them under the rule of law.

Although no paladin in the world could be described as typical, a number of them are narrow-minded dogooders who refuse to tolerate even the smallest deviation from their own outlook. Paladins who take up the adventuring life, however, rarely remain so rigid in their attitudes if only to keep from alienating their companions.

You can flesh out your paladin character by using the suggestions below. It's important to keep in mind that most paladins aren't robots. They have doubts and prejudices and harbor contradictory thoughts just as any other character does. Some are compelled by an internal motivation that might sometimes be at odds with the principles of their oaths.
